Целевые ориентиры ФГОС ДО:

ребенок проявляет любопытность, задает вопросы, касающиеся близких и далеких предметов и явлений, интересуется причинно - следственными связями (как? почему? зачем?), пытается самостоятельно придумывать объяснения явлениям природы и поступкам людей. Склонен наблюдать, экспериментировать. **Обладает начальными знаниями** о себе, о предметном, природном, социальном и культурном мире, в котором он живет. Знаком с книжной культурой, с детской литературой, обладает элементарными представлениями из области живой природы, естествознания, математики, истории и т. п., у ребенка складываются предпосылки грамотности. Ребенок способен к принятию собственных решений, опираясь на свои знания и умения в различных сферах действительности.
